

# NYC CRIME

---

BY AMY OWNBY, ERICA MORALES, SAMANTHA  
CANDIA, AND JAVIER BELTRAN

# INTRO

- For this project, we chose to focus on a crime dataset in New York City.
- We specifically looked at the year 2023 and analyzed the data to answer some questions and make our visualizations.
- Diving into the data, we looked at the five specific boroughs of New York City.
- We aimed to find out which crimes occurred the most and where, and if crime increased or decreased over the 12 months.

# IN SUMMARY

- Brooklyn and Manhattan appear to be the most active boroughs for crime.
- Staten Island seems to be the safest borough in NYC.
- Throughout 2023, crime numbers jumped all over the place, having a big spike in the spring and summer months.
